

Georgia Based *Industrial Vegetation Management*. Supporting Industrial & Government Sites Across the Southeast

Georgia & Southeast US
(678) 370-8686
team@vegclear.com

Cost-effective solutions: Our Vegetation Management Services adhere to budget & time constraints of industrial property managers. Proprietary formulations and precision applications provide **cost-effective weed control solutions** that minimize expenses & maximize results.

Expertise in diverse environments: Logistics, Utility, Communications & Industrial properties vary in terrain, climate, access, and vegetation mix. Our strategic programs and experience in regions across the US enable our customized solutions to effectively address the unique challenges posed by diverse industrial properties, ensuring **consistent and reliable control of unwanted vegetation**.

Time-saving measures: Expertise & dedicated personnel support commercial asset managers, **saving you time & resources** with all aspects of service, from planning, scheduling & product selection, to application & ongoing monitoring; all fully handled, allowing facilities managers to focus on important tasks, without having to constantly question their contractor's maintenance schedule.

Vegetation overgrowth: VegClear offers comprehensive Total Vegetation Control (TVC) that effectively eliminates weed and vegetation growth across wide acreage and high profile precision areas alike, providing industrial facilities leaders with a solution to maintain clean and well-manicured industrial spaces.

Industrial Vegetation Management by VegClear means cost effective bareground in areas where **vegetation growth is nonnegotiable**.

VegClear's in-house technicians work closely with herbicide research teams to develop precise delivery methods of proprietary herbicide blends for consistent weed control on various industrial property types across the Southeast US.

With a dedicated team, and long-term strategic partnerships, VegClear's unique maintenance approach to growth and vegetation control ensures **effective and reliable results for stewards of utility, municipal & industrial sites**.
